RESEARCH INTERESTS

I am a second year PhD student at the University of Michigan, Ann Arbor. My research focuses on fundamental questions in **machine learning**, **graph representation learning** and **graph neural networks (GNNs)**. Broadly, I study how to improve the interpretability, robustness, and fairness of GNNs in real-world settings such as social networks.

EDUCATION

University of Michigan, Ann Arbor Aug. 2021 - May 2026
Ph.D. in Computer Science (3.93/4.00 GPA) Ann Arbor, MI

- **Advisor**: Danai Koutra - Graph Exploration and Mining at Scale (GEMS) Lab
- **Fellowships:** Rackham Merit Fellow

California Polytechnic State University, San Luis Obispo Aug. 2014 - June 2018
B.S. in Physics (3.61/4.00 GPA) San Luis Obispo, CA

- **Minors**: Computer Science, Mathematics, Astronomy, Ethnic Studies

RECENT RESEARCH EXPERIENCE

MIT Lincoln Laboratory May 2022 - Aug. 2022
Research Intern - Advised by Dr. Rajmonda Caceres

- Developed a gradient-based optimization method to efficiently edit graph structures and improve task performance. Demonstrated the capabilities of this method through shortest path and substructure manipulation. Proposed method extended to Hyperbolic GNNs, and tested on a variety of other GNN architectures, demonstrating improvements of up to 60% over baseline heuristics. *Paper in Submission*

Lawrence Livermore National Lab Feb. 2019 - Sept. 2021
Applied Machine Learning Researcher

- Developed an XAI method for counterfactual introspection of DL models in PyTorch. Method was applied to materials science problems to extract domain-specific concepts learned by convolution neural networks. US patent recieved.
- Explored the relationship between adversarial training and post-hoc XAI methods for GNNs in PyTorch Geometric. Findings were presented at ICML XAI Workshop and used to elucidate important molecular substructures.
- Created an inverse design method for molecular graphs through a GNN-based RL model. New molecules were designed through an interpretable graph editing policy. Work was used to aid scientists in molecule discovery tasks.

TECHNICAL SKILLS

- **Programming Languages**: Python, Java (Basic)
- **Packages**: Pytorch, Pytorch-Geometric, Scikit-Learn, NetworkX

ADDITIONAL EXPERIENCE

Cambridge Coaching Dec. 2021 - Present

Computer Science and Math Tutor

- Tutoring students at various academic stages in courses such as high school AP computer science, undergraduate calculus, and graduate machine learning.

Cal Poly College of Science and Math August. 2016 - Dec. 2017

Peer Mentor/Advisor

- Mentored first-year students on academic probation with the goals of improving study skills, promoting time management, and helping with general adjustment to college.

*Denotes equal contribution
